## 100% vaccine coverage

Bill Gates announced the [global plan](#) as early as April 23, 2020. "The goal," he said, "is to pick the one or two best vaccine constructs and vaccinate the entire world - that's 7 billion doses if it is a single-dose vaccine, and 14 billion if it is a two-dose vaccine." National governments are merely the [executors of this long-established plan](#). A crucial component is to eliminate the possibility of natural immunization through previous infection. Herd immunity must be achieved entirely through vaccination. The [WHO states this clearly](#): "Allowing a disease to spread through any segment of the population ... would result in unnecessary cases and deaths." Ex-Health Min. Roman Prymula, who is basically the WHO's Czech spokesman, has already started [bad-mouthing natural immunization](#), esp. in relation to "long covid" complications. You'll be hearing more about this from him. The sequence and timing of these events suggest that voluntary vaccination was never part of the global plan.
